

Health Data Research UK's Digital Innovation Hubs

Our mission statement

use MY data is a movement of patients, carers and relatives.

use MY data supports and promotes the protection of individual choice, freedom and privacy in the sharing of healthcare data to improve patient treatments and outcomes.

use MY data endeavours to highlight the many benefits that appropriate usage of healthcare data can make, to save lives and improve care for all.

use MY data aims to educate and harness the patient voice to understand aspirations and concerns around the use of data in healthcare delivery, in service improvement and in research, aimed at improving patient decision making, treatment and experience.

Our vision

Our vision is of every patient willingly giving their data to help others, knowing that effective safeguards to maintain the confidentiality and anonymity of their data are applied consistently, transparently and rigorously.

Our position in relation to bids for Health Data Research UK's Digital Innovation Hubs

While we are unable to support a specific Digital Innovation Hub bid, we have principles around the way that data is managed and used, which are focused on:

- Openness
- Transparency
- Involvement
- Communication
- Recognition of the source of the data (the Patient Data Citation)

use MY data encourages bids to abide by the principles, which have been produced by its Advisory Group.

Further information

Full details of our work are available on our website www.useMYdata.org.uk

If further information is required, please contact coordinator@usemydata.org.uk
