

Case Study - Patient Advocate Stories

Ann Muir Patient Advocate, use MY data

My name is Ann Muir and I'm a laryngectomy patient.

Our cancer is the Cinderella of cancers in terms of funding and research. So it is vital that our data is used.

It may not help me, but may help others prevent their cancers in the future. That is why donating your data is so important. It could save future generations suffering some of the diseases in today's world.

I acknowledge that things don't always go right, but by sharing data, it is the only way to make progress in saving lives.

Joining use MY data has helped me understand better the importance of my data. Research and all data should be shared.

We are building an online library, where the patient voice is heard direct, talking about the rewards of using their data
